## Classification of Fe-bearing species from *K*-edge XANES data using two-parameter correlation plots. Erratum

Matthew A. Marcus *et al.*

---

### Synopsis

An erratum to the paper by Marcus *et al.* [(2008), *J. Synchrotron Rad.* **15**, 463–468].

### Queries and comments

Please supply or correct as appropriate all **bold underlined** text. In describing corrections please refer to line numbers where appropriate: these are shown in grey.

### Paper category

Please indicate the category which best describes your paper: (i) SR sources; (ii) beamlines and optics; (iii) detectors; (iv) electronics and data acquisition; (v) sample chambers and environment; (vi) diffraction; (vii) spectroscopy; (viii) imaging.

### Author index

Authors' names will normally be arranged alphabetically under their family name and this is commonly their last name. Prefixes (van, de *etc.*) will only be taken into account in the alphabetization if they begin with a capital letter. Authors wishing their names to be alphabetized differently should indicate this below. **Author names may appear more than once in this list; it is not necessary to mark this correction on your proofs.**

Marcus, M.A.  
Westphal, A.J.  
Fakra, S.C.

## Classification of Fe-bearing species from K-edge XANES data using two-parameter correlation plots. Erratum

In the paper by Marcus *et al.* [(2008), *J. Synchrotron Rad.* **15**,  
 463–468], an incorrect version of Table 1 was published. The  
 correct version is given here.

**Table 1**

Fit parameters for one-, two- and three-variable fits.

Variables	<i>a</i>	<i>b</i>	<i>c</i>	<i>d</i>	RMS error
$Y_{10}$	4.1425	-4.2737	1.9583		0.2090
$E_{\max}, E_{50}$	-1.0660	0.0574	0.2642	0	0.1959
$E_{25}, E_{50}, Y_{20}$	-1.4828	-0.2932	0.5260	0.8236	0.1817
